***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art, Brodrib teaches a body portion, head and tail, and four springs, an eccentrically mounted weight and a power operated switch controlled motor; however, the prior art fails to teach "a shaft located transverse to said body portion and disposed adjacent the head and supporting an eccentrically mounted weight" and "drive assembly for said shaft, said motor is reversible to drive the eccentric weight in both a clockwise and counter-clockwise direction to set up different motions of the animal depending on the speed and direction in which the counter weight is moved whereby upon operation of said motor and drive assembly the animal vibrates to provide a jumping action of said legs and attendant movement of said animal" as recited in claim 3 and "a shaft located transverse to said body portion and disposed adjacent the head and supporting an eccentrically mounted weight" and "a frame assembly that supports the eccentrically mounted weight and power operated motor and drive assembly and the spring legs are interconnected to said frame assembly, which frame assembly includes cap members for receiving the upper ends of the spring legs and there are provided pads connected to the lower ends of the legs, whereby the movement of the eccentric weight vibrates the frame assembly to provide a jumping action of the legs and attendant movement of the animal" as recited in claim 9 .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
